E-mail	duongductrong06@gmail.com	**Portfolio**	https://danielll.dev

Frontend Developer with over 4 years of experience building and scaling web applications in Agile environments. Proficient in React.js, Node.js, and JavaScript-based technologies, with a proven track record of contributing to impactful projects such as hyperlead.vn, langfarm.com, and casio.anhkhue.com.

Skills

Frontend Development: React.js, React Native, Vue.js, Next.js, Nuxt.js, Redux, Zustand, Tailwind CSS, Ant Design, Material UI, Cypress

Backend & APIs: Node.js (Nest.js, Express), PHP (Laravel), RESTful APIs

Databases: PostgreSQL, MongoDB, Redis

Cloud Storage & DevOps: AWS S3, Git, Docker (basic exposure)

Testing & Quality: Unit & E2E Testing (Jest, Cypress), Code Reviews

Agile & Collaboration: Jira, Confluence, Scrum/Kanban, Cross-functional Communication

Work Experience

2022-09 - Current

Software Engineer

WhammyTech, Ho Chi Minh City, Viet Nam

- Organized project architecture and conducted code reviews in alignment with clean code standards.
- Developed and maintained functional applications and APIs, ensuring seamless functionality across both the backend and frontend.
- Worked closely with clients to define requirements, ensure on-time delivery, and meet feature expectations.
- Mentored three fresher developers, providing guidance on coding standards, code quality.
- Worked with mobile apps using technologies such as React Native.

2021-04 - 2022-09

Frontend Developer

RIO Technology, Ho Chi Minh City, Viet Nam

- Worked closely with relevant teams to discuss and propose optimized technical solutions and designs to meet project requirements.
- Collaborated with senior developers, BA, and UI/UX designers to implement new features and enhance the overall user experience.
- Developed and maintained functional applications and APIs, ensuring seamless functionality across both the backend and frontend.
- Implemented critical rendering optimizations, reducing initial load times and reduce bundle sizes.
- Implemented unit and E2E tests (Cypress) to ensure high code quality and reliability.

2020-06 - 2021-04

Frontend Developer

Anflash Technology, Ho Chi Minh City, Viet Nam

- Participated in code reviews, contributing to the overall improvement of code quality and adherence to best practices.
- Collaborated with UX/UI designers to transform visual concepts into engaging and interactive web pages.
- Developed and maintained functional applications and APIs, supporting websites on the back-end and front-end.

Education

2018 - 2021

College Degree: Information Technology

Ton Duc Thang Univertisty - Ho Chi Minh City, Viet Nam.

Projects

Langfarm eCommerce | Fullstack Developer
Overview: Built an eCommerce platform focusing on user-friendly UI/UX to increase product visibility and boost sales.
Website: https://langfarm.com
Responsibilities
- Structured the project using Next.js 13 and Node.js (Nest.js), configured ESLint, and defined coding standards based on clean code principles.
- Rapidly implemented 90% of the designs into an intuitive interface using React Hook Form, React Query, Zustand, and Radix-UI, ensuring timely delivery while maintaining scalability and ease of maintenance.
- Provided technology solutions and problem-solving assistance to team members.
- Integrated the Payoo payment gateway and shipping providers (GHTK, VP) for seamless transaction and logistics management.

Ranhill SAJ Dashboard | Front-End Developer
Overview: A customizable, real-time data visualization platform with drag-and-drop widget support.
Responsibilities
- Designed the project with a modular architecture for scalability and maintainability using React and Redux.
- Implemented complex features such as drag-and-drop, layout grid, and data visualization using Apache ECharts, React Grid Layout, with API configurability for widgets.
- Established real-time communication via backend APIs for instant data updates and system alerts.
- Optimized chart rendering and UI responsiveness to ensure seamless performance across various screen sizes.

HyperLead Affiliate Platform | Fullstack Developer
Overview: An affiliate marketing platform for publishers to generate revenue from financial brand partnerships.
Website: https://hyperlead.vn
Responsibilities
- Optimized product page load times by refactoring code, bundling, and implementing caching strategies.
- Analyzed feature requirements and implemented APIs and integrations to the front-end for optimal functionality.
- Translated Figma designs into responsive, intuitive user interfaces, ensuring cross-device compatibility and smooth interactions.

Certifications

2021-01	React Certification - Hackerrank 2021
2020-09	Problem Solving Certification - Hackerrank 2020
